

Blowdown Silencer & Pig Barrel

Sunday, 10 August 2008 06:30 - Last Updated Friday, 23 November 2012 21:13

A&B is pleased to introduce a blowdown silencer & a 20" pig barrel as additions to our integrity services. The silencer diminishes noise and decreases time required to blow down your pipeline. The 20" pig barrel allows you to run inspection tools on 20" lines that do not have permanent pigging facilities. Please contact us for details at: info@abpipeliners.com .
